### **Guidelines:**

- Grant money is to be used for student enrichment, curriculum and activities within a budget of \$250, or with a description of additional potential funding streams.
- A request for educational materials must include a description of a specific enrichment project or activity directly related to those materials.
- Grant money is to be used on a per classroom basis, to benefit all students in the classroom as opposed to individual students and/or scholarship assistance.
- At this time the program is not funded to provide grants for group projects for multiple classrooms. In the future we hope to add this component. Teachers engaged in group projects are encouraged to submit individual applications with the understanding that only one (or not all) may be funded.
- While we recognize the importance of classroom supplies and equipment, we are unable to fulfill requests for these materials that are not directly related to specific enrichment activities.
